SUMMARY

Full Stack Developer with over 3 years of programming experience, including 1 year of professional work and 4 months of internship. Strong foundation in web development, specializing in Laravel and CodeIgniter frameworks. Proven ability to lead projects, ensure application scalability and maintainability, and enhance performance. Implementing clean architecture principles, and utilizing Docker containerization. Eager to leverage my skills and experiences to contribute effectively to a dynamic development.

WORKING EXPERIENCE

PT Kreasi Cyber Indonesia, Bondowoso

Sept 2023 – Dec 2023

Backend Developer (Internship)

- Contributed to multiple backend projects using Laravel within a small development team.
- Developed 3 web applications from scratch, focusing on performance and scalability.
- Applied clean architecture principles to improve code structure and reduce bugs.
- Utilized Docker containerization, improving application scalability by 30% and maintainability.

CV. SyammerTech, Gresik

Oct 2019 – Oct 2020

Web Developer

- Built and maintained 5+ web applications using Laravel and CodeIgniter 3, improving performance by 25%.
- Enhanced performance of web applications and databases, reducing load times by 40%.
- Involved in full development lifecycle, from planning and implementation to testing and deployment.
- Collaborated on frontend-backend integration and used Git for version control.

EDUCATION

State Polytechnic of Jember

2020 – 2024

Bachelor of Applied Computer

GPA 3.51 of 4.00

ACHIEVEMENTS

Finalist (Hackathon), State Polytechnic of Malang

Aug 2021

Finalist in KMIPN 2021, developed a mobile application "Sumbangin Aja" for food sharing, competing against 1500 applicants from polytechnics across Indonesia.
